Metal powder tubes produced by Werk HF were marked with three figures, e.g. 140/9/2, with the first figure indicating the series; the second, the current tube number of this series; and the third, the type of tube which, in the present example, was an LD 12 type. The date of production was indicated by a letter and a figure, with the year distinguished by a letter, e.g. "A" meaning 1947, and the month by a figure; e.g. "C 8" would mean August 1949. A current delivery number, as a rule, was also stamped on.

25X1A 1. Comment: A 2332A type magnetron, marked 135 B, has been assigned SOVMAT Item No. 1471.
